belts for harsh, abrasive conditions

Transtex – lightweight rubber & pvc

MOVEMENT SYSTEMS

Polyurethane Belts

for harsh abrasive conditions

Forbo Transtex Polyurethane is your front line against harsh, abrasive materials that can destroy your conveyor belts. Whether conveying recycled products, metal, wood, foundry products, food or chemicals, with Forbo Transtex Polyurethane belts you can handle the rough stuff.

Polyurethane Conveyor Applications

Transfer Conveyors
General Conveyors
In Feed Belt
Discharging Belt
Metering

Features	Benefits
Polyurethane cover	• Resistant to oils, chemicals, abrasion, cutting, gouging
Friction bottom cover	• Affords low coefficient of friction for slider beds • Able to hot weld v-guides to bottom
White and clear covers	• Meets food grade standards, all ingredients are FDA approved
2mm red covers	• Able to handle those tough cutting and gouging applications
Covers available in 85 and 90 Shore A durometer	• Maximum resistance to abrasion, cutting, and impingement
Covers available in 1mm-2mm	
Interwoven or plied construction	• Ability to custom design a carcass made to address specific application problems, such as, cutting and gouging, tracking, vulcanizing alternatives and smaller pulleys
Thermoplastic fabrication and joining	• Whether interwoven or plied, thermoplastic fabrication and joining will yield high tension and a smooth surface
